

Building Bitcoin's future in Portugal

Manifesto 2026

Who we are

An independent think tank focused exclusively on Bitcoin and a leading voice in Bitcoin research, education, and public policy in Portugal.

Why it matters

Our goal is for Portugal and all Portuguese people to have timely, relevant knowledge so they can benefit from Bitcoin.

Our vision

Portugal's development as a nation depends on how the country embraces emerging technologies like Bitcoin. We want to position Portugal wisely in relation to this technology, create opportunities for economic and technological development, and help safeguard Portugal's sovereignty as an independent nation.

Goals 2026

1. Clear legal and regulatory framework

- Support regulations that enable Bitcoin's inclusion in the current financial system, as a neutral asset and a vehicle for saving;
- Advocate for a legal framework that protects self-custody, peer-to-peer transactions, and technological neutrality, without discriminating against the direct use of Bitcoin;

2. Educate the public and policymakers

- Create a knowledge repository and produce policy briefs in the areas of economics, mining, and national security;
- Organize events to increase Bitcoin adoption and help individuals and businesses better understand the potential of this asset;
- Provide Bitcoin education and training for businesses and schools;

3. Tax policy reforms

- Advocate for a tax exemption on small Bitcoin sales to encourage the legitimate, responsible, and transparent use of Bitcoin;
- Advocate for reforming the taxation of capital gains from mining activity, so that Bitcoin can be integrated as part of the solution for Europe's energy transition;

4. Drive Bitcoin innovation

- Support new Bitcoin projects in Portugal;
- Establish strategic partnerships with leading Bitcoin associations and institutions to build a European and transatlantic network of intellectual and institutional collaboration;

Our Core Principles

Lead

Act as Portugal's leading voice on Bitcoin and promote its adoption and use as an innovative, decentralized, and secure technology.

Influence

Engage regularly with lawmakers and regulators to influence and advise the development of Bitcoin-friendly laws.

Sovereignty

Promote individual sovereignty and national resilience through Bitcoin self-custody, empowering Portuguese citizens and businesses to face global economic challenges.

Education

Create and share educational materials about Bitcoin, the political and economic landscape around it, and the technology that makes the network possible.
